Professional Summary

Data Analyst and Master of Data Science graduate from Deakin University with hands-on experience in data analysis, business intelligence, ETL and AI-driven analytics solutions. Skilled in SQL, Python, Power BI, Tableau, Excel, DAX and data modelling, with experience cleaning and transforming data, validating analytical outputs, developing dashboards and translating data into actionable insights. Experienced in working with technical and business stakeholders to understand requirements, investigate data issues and support practical data solutions. Strong foundation in machine learning and modern data platforms, including Databricks, PySpark, Delta Lake and AWS.

Technical Skills

Data Analytics: SQL, Python, Pandas, Data Cleaning, Data Wrangling, Exploratory Data Analysis, Statistical Analysis, Predictive Analytics, Data Validation

Business Intelligence: Power BI, Tableau, DAX, Power Query, Dashboard Development, Data Visualisation, KPI Reporting, Data Storytelling

Data Engineering: ETL, Data Transformation, Data Integration, Data Modelling, Data Reconciliation, Data Quality, PySpark, Databricks, Delta Lake

Machine Learning: Regression, Classification, Clustering, Scikit-learn, XGBoost, NLP

Databases: Microsoft SQL Server, MySQL, PostgreSQL, SQLite

Cloud & Tools: AWS S3, AWS EC2, Docker, FastAPI, REST APIs, Streamlit, Git, GitHub, Jupyter Notebook, VS Code

Excel: Microsoft Excel, PivotTables, XLOOKUP, Data Cleaning, Data Analysis, Reporting Automation

Professional: Stakeholder Engagement, Requirements Analysis, Process Improvement, Problem Solving, Communication, Cross-functional Collaboration

Professional Experience

Lorgan

Aug 2025 – Present

Data Analytics Intern

AI-Powered University Recommendation System

- Automated university data extraction by designing and optimising Microsoft Copilot prompts to collect information from multiple university sources, reducing manual research effort and streamlining data preparation for analytics and AI workflows.
- Cleaned, validated and standardised structured and unstructured university data, including admission requirements, tuition fees, scholarships, eligibility criteria and programme information, improving data consistency for AI-powered recommendations.
- Collaborated with business and technical stakeholders to translate requirements into data extraction, preparation and reporting workflows supporting student-university matching and decision-making.

Academic Collaboration & Product Development Mentorship

- Led collaboration between Lorgan and multidisciplinary university project teams, coordinating stakeholder communication and supporting project delivery.
- Translated business requirements into technical deliverables, reviewed solutions and provided feedback to improve product quality and alignment with organisational objectives.
- Managed project milestones, stakeholder communication, technical deliverables and risks while validating project outcomes against business requirements.

LTIMindtree

Sep 2023 – Dec 2023

Graduate Intern – Ignite Internship Program

- Extracted, cleaned and analysed datasets using SQL and Python, applying joins, filtering, aggregations and validation techniques to produce accurate analytical outputs.
- Developed Power BI dashboards using Power Query, DAX and data modelling to communicate KPIs, trends and business insights.
- Investigated data inconsistencies, validated reporting outputs and collaborated with project teams to improve data quality and analytical workflows.

Academic Projects

StockWise – Retail Data Engineering & Analytics Pipeline *Databricks, PySpark, SQL, AWS S3, Delta Lake, Tableau*

- Developed an end-to-end data pipeline using AWS S3, Databricks, Apache Spark and Delta Lake, implementing Bronze, Silver and Gold layers for structured data processing.
- Performed data cleaning, transformation, validation and reconciliation using PySpark and SQL to create reliable datasets for downstream analysis.
- Developed SQL-based analytics and Tableau visualisations to analyse KPIs, trends and performance metrics and support data-driven decision-making.

AI Job Market Analysis Dashboard

Power BI, SQL, DAX, Power Query

- Analysed 10,345 records using SQL and Power BI to identify trends, patterns and key performance indicators.
- Developed an interactive Power BI dashboard using Power Query, DAX and data modelling to monitor KPIs, trends and performance metrics.
- Performed data validation and quality checks and translated analytical findings into clear insights and recommendations for stakeholders.

Melbourne Housing Price Analysis

Python, Pandas, SQL, XGBoost, Power BI

- Cleaned, transformed and analysed Melbourne housing data using Python, Pandas and SQL to identify pricing trends and factors influencing property values.
- Developed and compared XGBoost, Random Forest and Linear Regression models, achieving an R^2 score of 0.7895 following GridSearchCV optimisation.
- Evaluated feature importance and model performance and developed Power BI visualisations to communicate pricing trends and analytical insights.

AI-Powered ATS Resume Analyzer

Python, NLP, FastAPI, Streamlit, Docker, AWS

- Developed an end-to-end AI-powered resume screening application using Python, FastAPI and Streamlit to automate candidate evaluation and job matching.
- Implemented an NLP pipeline combining text preprocessing, synonym mapping, fuzzy matching and Sentence Transformers for automated skill extraction and semantic matching.
- Built a hybrid scoring engine using keyword overlap, TF-IDF and semantic similarity, then containerised and deployed the application using Docker and AWS EC2.

Education

Master of Data Science, Deakin University

Jun 2024 – Jul 2026

Relevant Coursework: Database Systems, Data Wrangling, Statistical Data Analysis, Machine Learning

Electronics and Communication Engineering, Osmania University

Aug 2019 – May 2023

Relevant Coursework: SQL, DBMS, Data Structures & Algorithms, Probability, Engineering Mathematics

Certifications

- Excel Fundamentals – DataCamp
- Data Analysis with Excel Power Tools – DataCamp
- SQL Fundamentals Skill Track – DataCamp
- PwC Switzerland Power BI Job Simulation – Forage
- Math and Statistics for AI, Data Science – Codebasics
